Revenue and profit by lead source · Jul 1, 2026 – Sep 30, 2026

Nouman GC — the model home

As of **October 8, 2026**
Period **Jul 1, 2026 – Sep 30, 2026**
3 item(s) need a look

Revenue from tracked leads	Gross profit from tracked leads	Customers won	Not from tracked leads
$62,750.00	$14,790.00	3	$14,750.00
$77,500.00 total sales in period	jobs with recorded costs: 3 of 4	from 19 leads · win rate 15.79%	3 customer(s)

Lead source	Leads in period	Customers won	Win rate	Revenue in period	Gross profit	Revenue per lead
Google Ads	7	1	14.29%	$41,250.00	$11,100.00	$5,892.86
Facebook Ads	6 7 rows	2	33.33%	$21,500.00	$3,690.00 costs for 1 of 2 jobs	$3,583.33
Google Business Profile	3	0	0.00%	$0.00	— no jobs	$0.00
Website form	2	0	0.00%	$0.00	— no jobs	$0.00
Source not given	1	0	0.00%	$0.00	— no jobs	$0.00
All tracked sources	**19** 20 rows	**3**	**15.79%**	**$62,750.00**	**$14,790.00** costs for 3 of 4 jobs	**$3,302.63**
Not from tracked leads no lead matched, or the lead came after the first invoice	—	—	—	$14,750.00	$4,700.00	—
All sales in the period				**$77,500.00**		

How to read this

- **Revenue** = invoices and sales receipts dated in the period, less credit memos, from the contractor's QuickBooks.
- **Customers won** = customers whose first invoice is in the period, credited to the first lead they came in as, on or before that invoice. Each customer counts once, for one source.
- **Win rate** = customers won ÷ leads in the period. A customer can come from a lead in an earlier period.

What the profit column shows

- **Gross profit** = revenue − job costs recorded in QuickBooks (Profit and Loss by Customer), only for jobs that have recorded costs.
- Where no costs are recorded, profit is not shown — it is never taken to be the revenue.
- Anything not matched exactly is on the "needs a look" page (3 item(s)) and is not counted.

Needs a look

"Check" items were left out of the figures until someone confirms them. "Note" items explain how a figure was reached.

1. Check **Jon Whitlock** — Possible match: lead "John Whitlock" (Website form, Aug 1, 2026) — names are close but not the same. Not counted; $5,400.00 shown as not from tracked leads. Confirm with the contractor.
2. Check **Curtis Banda** — Lead "Curtis Banda" (Google Business Profile, Sep 20, 2026) came after the first invoice (Sep 5, 2026) — already a customer, so not credited. $6,200.00 counted as not from tracked leads.
3. Check **Tom Reddy** — Lead on row 10: date 'sometime in July' could not be read — left out of every count.
4. Note **Dale Prewitt** — First invoice Jun 28, 2026, before the period — his revenue in the period counts for Google Ads, but he is not counted again as a customer won.
5. Note **Ray Okafor** — Leads in 2 sources (Facebook Ads, Google Ads) — credited once, to the earliest: Facebook Ads, Jul 5, 2026.
6. Note Facebook Ads: 7 lead rows are 6 people — repeat rows for the same email, phone or name counted once.
7. Note **Ray Okafor** — No job costs for "Ray Okafor:Porch rebuild" in the P&L report — its revenue is counted, its profit is not.
8. Note 1 job(s) have costs in the P&L but no sales in the period (Sample Property Mgmt:Unit 7 repaint) — not in any profit figure.

What this was made from

Sales	qbo-invoice-list.csv (sample)
Job costs	qbo-profit-and-loss-by-customer.csv (sample)
Contacts	qbo-customer-contact-list.csv (sample)
Leads	agency-leads.csv (sample)

How it is worked out

Matching	Same email, then same phone (last 10 digits), then the same name (case, spacing and punctuation ignored). Email or phone beats name. A name that is only close is never counted.
One lead per customer	The earliest matching lead dated on or before the customer's first invoice. A lead after the first invoice is not credit — he was already a customer.
Leads	Lead rows dated in the period; repeat rows for the same person in the same source count once.
Every dollar once	Each dollar of sales in the period is in exactly one line: one source, or "not from tracked leads". The tool stops if the lines do not add up to all sales in the period.

What this is not

Prepared from figures supplied by Nouman GC — the model home and Mastodon Marketing; not audited; not accounting advice. It shows what the contractor's own records say about customers who came in as leads; it does not claim that the marketing caused any sale, and it makes no forecast.
